2008	8	6,500	340+
Established	Countries of operation	Directly employed personnel	Sites under contract

Company overview

We were established to serve buildings where service failure has consequences: hospitals, airports, government estates, industrial plants and high-occupancy commercial property.

We self-deliver our core services through directly employed, vetted and trained personnel, and manage specialist subcontractors under our own quality, HSE and reporting controls.

Operating principles

Specified before delivered

Every contract starts with a written specification. We do not mobilise against an undefined scope.

Measured independently

Quality audits are carried out by a function that does not report to site management.

One accountable manager

Every contract has a named contract manager who owns performance and the KPI report.

Direct employment

Core services are delivered by our own employees, not labour agencies, so training and vetting are under our control.

Services

SERVICE	SUMMARY	STANDARDS
Integrated Facility Management	Hard and soft services under one contract, one helpdesk and one performance framework.	ISO 41001 aligned
Commercial Cleaning	Daily, periodic and deep cleaning delivered against a written specification and verified by audit.	BICSc-trained operatives
Healthcare & Clinical Cleaning	Infection-control cleaning for wards, theatres and clinics, aligned to national cleanliness standards.	National cleanliness standards (country-specific)
Industrial Cleaning	Plant, warehouse and production-area cleaning under permit-to-work controls.	ISO 45001
Specialist & Deep Cleaning	Façade, high-level, kitchen extract and decontamination work by certified teams.	IRATA rope access
Planned Preventive Maintenance	PPM schedules and statutory testing across MEP, HVAC and building fabric.	SFG20
Reactive Maintenance	SLA-driven call-outs with 24/7 dispatch and first-time fix targets.	ISO 9001 / 45001
Building Support Services	Waste, pest control, washroom services and front-of-house, managed to the same standard.	ISO 14001

Sectors

SECTOR	OPERATING REQUIREMENT
Healthcare & Hospitals	Infection control, clinical risk ratings, 24/7 rapid response.
Airports & Transport	Airside security clearance, passenger-flow scheduling, zero downtime.
Government & Public Sector	Vetted personnel, framework compliance, transparent reporting.
Office Towers & Corporate	Out-of-hours delivery, tenant experience, ESG reporting.
Education & Campuses	Safeguarding, term-time planning, holiday deep-clean programmes.
Industrial & Energy	Permit-to-work, HSE leadership, specialist access.
Retail & Mixed-Use	Trading-hours presence, public safety, brand-standard environments.
Property Portfolios	Consistent standards across sites, portfolio reporting, cost control.

Delivery model

STAGE	WHAT HAPPENS	OUTPUT
Survey	Site walk, asset register review and risk assessment by an operations manager — not a salesperson.	Site survey report
Specify	Task frequencies, staffing model and KPIs written into a specification you sign off.	Service specification
Mobilise	Recruitment, TUPE, vetting, training and equipment delivered to a dated mobilisation plan.	Mobilisation plan
Deliver	Supervised shifts, digital task sign-off and a 24/7 service desk for reactive requests.	Daily task records
Report	Monthly performance reviews against agreed KPIs, with audit evidence and corrective actions.	Monthly KPI report

Contract governance

Site supervisor	Shift delivery, task sign-off, first-line quality checks
Contract manager	Single point of accountability for performance and the KPI report
Regional operations director	Escalation, resourcing and quarterly contract review
Quality & HSE function	Independent audits, incident investigation, certification

Certifications
